

SMARTer MANAGER

JOB COSTING

SMARTer Manager Job Costing is a comprehensive manufacturing component, designed specifically for tracking labor, material and resource costs. With our Job Costing feature you can compare actual to estimates; review job costing for materials or subcontracting, track operation labor; and see projected and actual billings. Job costing can be performed on job-by-job, by customer or part or overall company basis.

Could you increase profits if actual job costing was available on every order?

We eliminate duplicate data entry by linking all the modules so that all costs are captured and associated correctly, in real-time.

During a job new costs may apply, and SMARTer Manager makes changes as they occur.

Features

- * Real-time job costing of materials and labor.
- * Costs accumulate in real-time.
- * Completely integrated to all SMARTer Manager modules for accurate data collection.
- * Track costs to individual shipments and orders.
- * Associate additional expenses to a job through the accounts payable module.
- * Activity-based cost accounting, standard, average, LIFO, FIFO.
- * Production margin and cost analysis by part, assembly, company location, department, or market segment.
- * Create multiple costs for a designated part.

Benefits

- * Integrated accounting and production modules eliminate duplicate entries between departments.
- * Know the cost and profitability of every job, order and part.
- * Drilling down to individual job costs is a mouse click away.
- * Inventory levels increase or decrease as orders are placed and purchase orders are received.

Job Cost Analysis							
Statistics		Transactions					
Statistics		Job Number	Shipment		Unit		
		1012	4/23/2006		EACH		
		Ordered	Production	Shipped	Required	Target	Shipped
